

WILD BOAR

Driven hunts in Tajikistan

Wild Boar in Tajikistan

Tajikistan is a middle point in Central Asia. With the total 143 thousands square kilometers and about 8 million people it borders to Uzbekistan, Kyrgyzstan, China and Afghanistan.

Our wild boar hunting area "Kulyab" is just 260 km to South-West from the capitol Dushanbe at the border with Afghanistan. The terrain is low-mountains covered with little forest and bushes.

Route

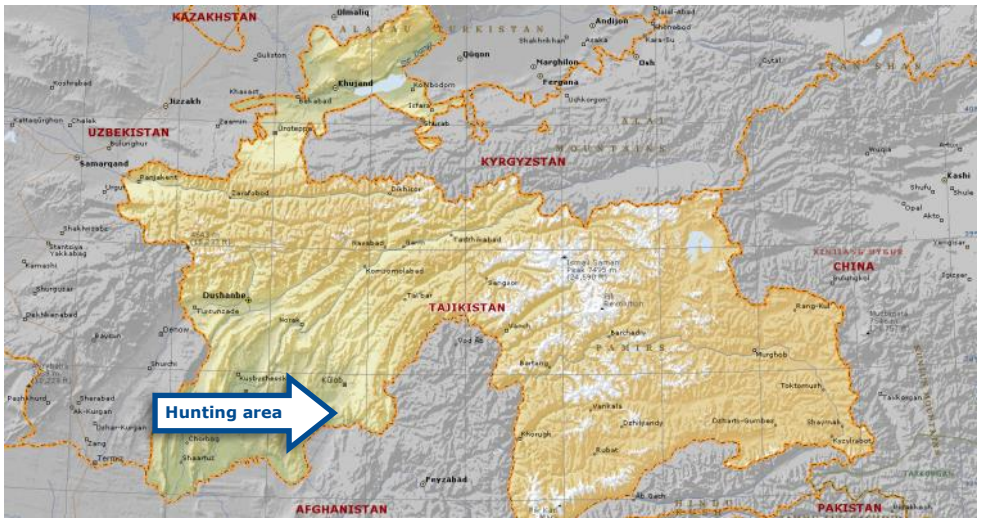

We recommend to fly via Istanbul (Turkey) or Moscow (Russia) to Dushanbe. From the

airport you will be transferred to the hunting area by Land Cruiser or Minivan. It takes about 5 hours.

Accommodation

While your stay you will be accommodate in the big house in the village next to the National Park. We have for you 2 rooms in the 1st floor and one big living room in the 2nd floor. All are cozy but clean. For meal you will have local Asian cuisine as well as traditional Russian food. You can receive your Visa right upon arrival at the airport of Dushanbe.

Hunt

Because of very good nutritious plants (kind of wild growing fruits) and very small hunting pressure (nobody can come next to the National Park without special permit) we have huge population of wild boar in this area. During your hunt you will see hundreds of wild boars every day!

The predominantly Muslim population does not hunt on boars. This effects not only a numerically high population of boars, but those also with very good quality tasks. Every year we harvest long and thick

tasks - and this is what the hunters want. Experienced drivers (push hunters) and capable dogs are guarantors of good routes. It is based on a large scale and usually carried out 4 to 5 drives per day (2 drives before and 2 drives after lunch). To put out the hunters on their positions we use small and maneuverable off-road vehicles.

Driven hunting in this area can be done from November to March due to the relatively mild winter (little snow).

Wild Boar in Tajikistan
